OUR FALL PROMOTIONS WILL REPEAT THE PERFORMANCE

HERE THEY ARE:

Eagle's Nest Fairview Mining Co.	35c. Per Share
Lou Dillon Goldfield Mining Co.	30c. Per Share
As-You-Like-It Manhattan Mining Co.	25c. Per Share

Each of these companies owns a great gold mining property, situated in the immediate vicinity of other bonanza mines of its respective district, and believed by our famous mining engineer, who has never been connected with a mining failure, to have a tremendous future.

All three are under the same capable, honest management. Governor John Sparks of Nevada is President; John D. Campbell, president of the Indian Camp and Stray Dog, is Vice President; L. M. Sullivan, president of the L. M. Sullivan Trust Co., is Treasurer, and James E. Degan, cashier of the Nye & Ormsby Co. Bank of Goldfield, is Secretary.

These Fall Issues have been practically oversubscribed, in advance of public announcement, by bankers, brokers and mining men throughout the country, and we have been able to reserve only 100,000 shares of each for investors who shall now make direct subscription. These stocks will be listed on the important exchanges of San Francisco, Salt Lake, Goldfield and New York immediately after subscriptions are closed, and will, beyond a doubt, at once command a premium. We recommend both stocks as high-class speculative investments and probable big future dividend-payers.

Reservations should be made by telegraph to insure consideration, and remittances in full by bank draft or certified check must be forwarded immediately after allotment is made. Otherwise allotment will be rendered void. The right is reserved to reduce or refuse any subscription tendered.

The World of Finance and Trade

Stock Dealings Drag With Professional Tone.

CONTRAST TO RECENT DAYS

Some Individual Issues Took Occasional Spurts.

LONDON MARKET WAS STEADY

The Last Days of Registration Rather Tended to Quiet the Pre-Election Fears.

Special Dispatch to The Star.

NEW YORK, October 16.—Today's stock market was so extremely dull in comparison with the most of its predecessors during the month that varying constructions might be placed upon its tone, according to the individual point of view. It was not so much that the total volume of business fell very much below recent averages as that the market could be designated as dull as it was that such business as was transacted appeared to be wholly of a professional character. In fact, even some of the houses with the most extensive private wire connections to the interior reported an entire absence of orders during the first hour of business.

After midday there were occasional spurts of increased animation, but for the most part these were confined to individual securities, not extending to the market at large. In these circumstances it must be noted that during the greater part of the day the trading exhibited a decidedly firm tone, or at all events such price changes as were scored were toward higher figures.

Improved English Outlook.

There appeared to be a further diminution of anxiety with regard to the out-turn of the November elections, based in some measure upon the conclusion of the registration in this city last evening, the figures of which were published this morning. Then again the London stock market was generally steady on what was described as the improving monetary outlook there, although the latter did not find expression in any substantial changes in rates.

Foreign houses were buyers in this market, however, to the extent of about 15,000 shares.

Local monetary condition showed little alteration in any direction. This morning's figures of the transactions between the banks and the sub-treasury pointed to a gain by the former since last Friday of upward of \$1,000,000, but of course the recent heavy shipments of funds to Canada in connection with the business disturbances there were not included in this return. There was an unusual dearth of real news, even of a routine character, relating to particular securities.

Copper Dividend Suspense.

Amalgamated Copper was one of the leading features of the whole market in point of strength and activity, and the course of that stock created a favorable impression, as suggesting the probable attitude toward the situation at large of the individuals so directly interested in the Wall street imagination directing the affairs of that property. Much doubt was still expressed, however, in well informed quarters with regard to the action to be taken upon the dividend on the stock on Thursday. In the meantime there was another sharp rise in the price of the metal in the London market.
